

LIGHTING OPTIONS FOR CUSTOM SAUNAS

SAUNA SAUNAGLO 72 LIGHTING SET

Enhance your sauna experience with the SaunaGlo 72 Lighting Set.

With premium LED strip lights, this energy-efficient system provides warm, soothing illumination that elevates comfort and style in your wellness sanctuary.

Designed for sauna conditions, the SaunaGlo 72 Lighting Set features heat- and moisture-resistant components, ensuring safety and longevity in high-heat environments.

Its sleek, modern design effortlessly complements both indoor and outdoor saunas, blending beautifully with wooden interiors.

- Operates in up to 120°C (248°F) – no flickering or failure
- Sleek batten design in 46" and 72" sizes to blend into the interior
- Bright, even, soft LED lighting
- Remote-controlled brightness adjustment (cedar-mounted)
- 110v and includes 12 v power
- Mount vertically or horizontally

SAUNA SAUNAGLO 43 LIGHTING SET

Enhance your sauna experience with the SaunaGlo 43 Lighting Set.

With premium LED strip lights, this energy-efficient system provides warm, soothing illumination that elevates comfort and style in your wellness sanctuary.

Designed for sauna conditions, the SaunaGlo 43 Lighting Set features heat- and moisture-resistant components, ensuring safety and longevity in high-heat environments.

Its sleek, modern design effortlessly complements both indoor and outdoor saunas, blending beautifully with wooden interiors.

- Operates in up to 120°C (248°F) – no flickering or failure
- Sleek batten design in 43" and 72" sizes to blend into the interior
- Bright, even, soft LED lighting
- Remote-controlled brightness adjustment (cedar-mounted)
- 110v and includes 12 v power
- Mount vertically or horizontally

To synchronize the controller with the lights:

1. Unplug the power supply (if it was plugged in)
2. Wait at least 20 seconds (so that the supply voltage has died down)
3. Plug the power supply back in
4. Within 10 seconds of plugging it in, press the next button on the remote control (press once briefly)

5. The LED at the light will flash green confirming the light was synchronized to the wall remote.
6. After a short period of time the flashing LED will turn into a permanently green light.
7. The light will now only accept commands of this wall remote control.
8. You can redo the synchronization process at any time by following the above steps.

Electric Sauna Light

Introducing the standard Electric Sauna Light -- built to withstand high temperatures and moisture.

The efficient design ensures safe and reliable illumination, creating a relaxing and soothing atmosphere in your sauna.

The classic oval shape and marine-grade construction seamlessly complement wood interiors, making this light an ideal addition to your wellness space for consistent, long-lasting lighting.

Requires 110-volt electrical service.

Dimensions: 8.5" (21.5 cm) height, 5" (13 cm) width, 4" (10 cm) depth
